PTFE FLANGE SAFETY SPRAY SHIELD

PTFE flanges spray shields are designed to prevent a catastrophe by temporarily containing hazardous leaks and sprays.

Leaks can occur on pipes systems conveying chemicals, high temperature fluids and steam, which can harm workers, nearby equipment and the environment.

Leaks of flammables, such as fuel or oil, can create fire and explosion hazards.

PTFE(PVC,PP,STAINLESS STEEL) FLANGES SHIELD

PTFE(PVC,PP,STAINLESS STEEL) VALVE SHIELD

PTFE(PVC,PP,STAINLESS STEEL) EXPANSION JOINT SHIELD

PTFE(PVC,PP,STAINLESS STEEL) SIGHT GLASSES SHIELD

PTFE(PVC,PP,STAINLESS STEEL) PUMPS SHIELD
